

K–3 UNIVERSAL READING SCREENERS

Georgia Early Literacy Report

What every public school's kindergarten through third-grade screeners showed in 2025–26, fall to spring, across Georgia's 16 RESAs, and how the schools served by Let's Read, Georgia! literacy coaches compare with the rest.

Screening windows

Fall 2025, winter and spring 2026

June 2026**

What the 2025–26 screeners show

Every Georgia public school screens its kindergarten through third-grade students three times a year and reports, grade by grade, how many it screened, how many are at risk of not reaching grade-level reading, and how many need a tiered reading support plan. This report brings together those results for all 1,324 schools in the state's file.

AT RISK, K–3, AVERAGE SCHOOL

Key findings

- Statewide, the share of K–3 students flagged at risk in the average school fell 4.7 points from fall to spring (22.3% to 17.6%), falling in every grade.
- Kindergarten fell most: 21.0% in fall to 14.6% in spring.
- The share at risk fell in 13 of 16 RESAs; it held level in Griffin RESA and Southwest Georgia RESA, and rose in Central Savannah River Area RESA (18.7% to 22.0%).
- Schools served by LRG coaches moved about as much as other schools: across K–3 the share at risk fell 4.8 points in LRG-served schools and 4.5 in the others.
- In kindergarten the share at risk fell 8.1 points in LRG-served schools and 4.7 in the others: served schools went from 22.5% to 14.4%, the others from 19.4% to 14.7%.
- Compared only with other schools in the same RESA, the kindergarten difference shrinks from 3.4 to 1.8 points, and served schools came out ahead (their share fell further or rose less) in 7 of the 13 RESAs with at least five schools on each side.
- Screening was close to universal: the average school screened about 96% of its K–3 students in each window.
- Four screeners covered all but 2 schools: Amira ISIP (54%), i-Ready (23%), Star (15%) and mCLASS DIBELS 8 (7%).

What is a universal screener? A brief, standardized check of foundational reading skills given to every student in a grade, not only those already known to struggle. Under the Georgia Early Literacy Act, schools screen kindergarten through third grade three times a year with a tool from the State Board's approved list.

Grade by grade, fall to spring

The share of students each school's screener flagged as at risk of not reaching grade-level reading, in the average Georgia school. Each grade compares the same schools across the year: those that reported it in all three windows.

% AT RISK	FALL	WINTER	SPRING	CHANGE	SCHOOLS
Kindergarten	21.0%	19.1%	14.6%	-6.4	1,236
Grade 1	21.2%	18.8%	18.1%	-3.1	1,237

Support plans and screening

K-3 COMBINED, AVERAGE SCHOOL	FALL	WINTER	SPRING	CHANGE
At risk of not reaching grade-level reading	22.3%	19.5%	17.6%	-4.7
Needing a tiered reading support plan	15.1%	15.7%	14.5%	-0.6
Screened	96.0%	96.2%	95.9%	-0.1

Only the at-risk change is coloured. Fewer support plans can mean fewer struggling readers or fewer students getting support, and the data can't say which; the screening rate is a check on coverage, not an outcome.

Reading these numbers. Each school reports percentages, not student counts, so every figure is the average school: a small school counts as much as a large one. Changes are in percentage points. “At risk” is defined by each screener product, so compare schools and regions with the screener mix in mind.

Schools served by LRG coaches and the rest

Let's Read, Georgia! places regional literacy coaches in all 16 RESAs. In 2025–26 its coaches served 707 of the 1,324 schools in this report. Each line below is the average school in its group.

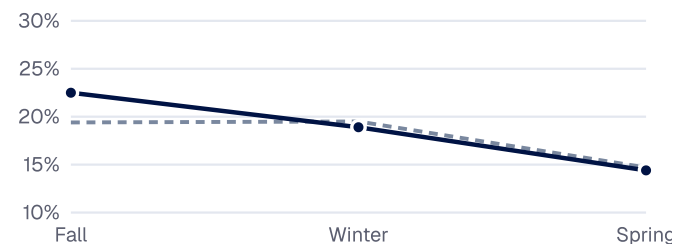

Across kindergarten through third grade, the share of students at risk in the average LRG-served school fell 4.8 points (22.6% to 17.8%); in the average other school it fell 4.5 points (21.9% to 17.4%).

The widest difference is in kindergarten: LRG-served schools fell 8.1 points, other schools fell 4.7 points. Served schools started the year higher (22.5% against 19.4%) and finished at 14.4% against 14.7%.

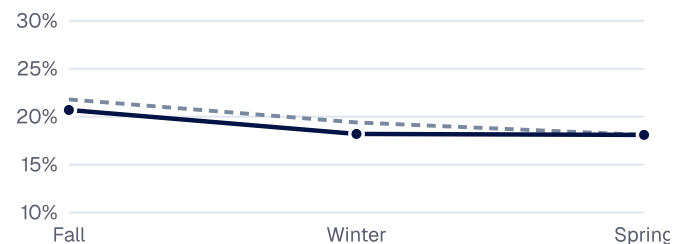

Compared only with other schools in the same RESA, the kindergarten difference shrinks from 3.4 to 1.8 points, and served schools came out ahead (their share fell further or rose less) in 7 of the 13 RESAs with at least five schools on each side.

Schools served by LRG coaches Other schools

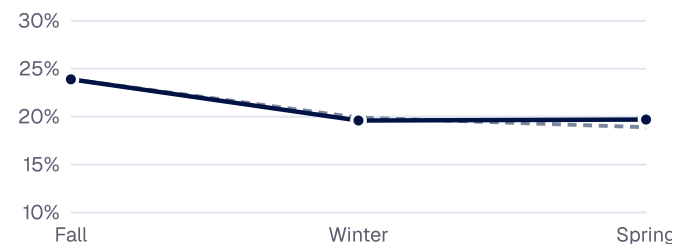

Kindergarten

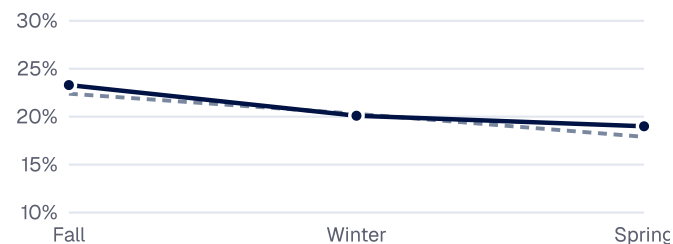

Grade 1

Grade 2

Grade 3

% AT RISK	LRG FALL	LRG SPRING	CHANGE	OTHER FALL	OTHER SPRING	CHANGE	DIFFERENCE	SAME RESA
Kindergarten	22.5%	14.4%	-8.1	19.4%	14.7%	-4.7	-3.4	-1.8
Grade 1	20.7%	18.1%	-2.6	21.8%	18.1%	-3.7	+1.1	+0.8
Grade 2	23.9%	19.7%	-4.2	23.9%	18.9%	-5.0	+0.8	+0.4
Grade 3	23.3%	19.0%	-4.3	22.4%	17.9%	-4.5	+0.2	-0.9
K–3 combined	22.6%	17.8%	-4.8	21.9%	17.4%	-4.5	-0.3	-0.4

Difference is the served schools' change minus the other schools' change, in percentage points; below zero, the share at risk fell further (or rose less) in LRG-served schools. Same RESA measures it only between schools in the same RESA (pooled over RESAs with five or more schools on each side), the closer like-for-like comparison, since most “other” schools are in Metro.

This compares two groups of schools; it does not isolate what coaching caused. The groups can differ before any coaching begins, and each school's “at risk” line is set by the screener it uses.

All 16 RESAs, side by side

Listed alphabetically. RESAs use different mixes of screeners, and each product sets its own line for “at risk”, so read this as sixteen reports on one page rather than a ranking.

About this data

Source

The Georgia Department of Education's universal screening report under the Georgia Early Literacy Act, covering screenings from 1 September 2025 to 1 June 2026, as shared with the RESAs (data as of 26 June 2026). Schools report at the 1 October, 1 February and 1 June cycles, shown here as fall, winter and spring. Figures are as each school reported them; a few spring submissions were still awaiting approval when the file was pulled.

How the averages work

The report gives percentages, not student counts, so every figure is the average school: each school counts once, whatever its size. Fall-to-spring changes compare the same schools, those that reported a grade in all three windows. The 18 schools that changed screener products mid-year are left out of changes, since their fall and spring numbers come from different tests.

What was left out

Schools that marked every K–3 field not applicable (alternative, virtual and residential programs) are not included. 19 schools are missing results for at least one window and drop out of fall-to-spring changes for the grades affected; each RESA's page names them. Brantley County's spring screening was waived after the wildfires. Clinch County Elementary appears under Okefenokee RESA; the state file lists it under Metro.

Terms used in this report

Universal screener

A brief, standardized check of foundational reading skills given to every student in a grade. Georgia schools screen kindergarten through third grade three times a year.

Tiered reading support plan

A plan of additional reading support for a student, reported by schools as a share of each grade.

Percentage points

The difference between two percentages. A move from 20% to 15% is a fall of 5 percentage points (and a 25% relative decrease).

Let's Read, Georgia! (LRG)

A statewide literacy initiative launched in July 2024 that places regional literacy coaches in all 16 of Georgia's RESAs.

The three measures

For each of kindergarten through grade 3, schools report the percentage of students screened, the percentage at risk of not achieving grade-level reading proficiency, and the percentage requiring a tiered reading support plan. "At risk" is defined by each screener, so the same child could land on either side of the line on a different product.

Which schools LRG served

The state report doesn't record this. It comes from Let's Read, Georgia!'s own copy of the report, where each served school is highlighted. A served-versus-other comparison is shown only where both groups have at least five schools.

Georgia Milestones

The state report also carries third-grade Milestones reading columns, but they are filled in for too few schools to use. Third-grade Milestones results by school are on our [Milestones dashboards](#) for First District RESA.

At risk

A student whose screener results show risk of not achieving grade-level reading proficiency. Each screener product sets its own cut point.

Fall, winter, spring

The 1 October, 1 February and 1 June reporting cycles of the state screening report.

Average school

The mean of each school's own percentage, so every school counts equally regardless of enrollment.

DATA NOTES

Schools missing a screening window (19)

These schools are in the report but have no at-risk results for at least one window, so they drop out of fall-to-spring changes for the grades affected.

DATA NOTES

Schools that changed screener during the year (18)

Each product sets its own line for “at risk”, so these schools’ fall and spring results aren’t comparable. They are left out of every fall-to-spring change.
